SAVING ANIMALS FROM EXTINCTION

BLACK-FOOTED FERRET

Help Save Black-footed Ferrets

Black-footed Ferret. @Kristy Bly/World Wildlife Fund – US

Black-footed ferrets are one of North America's most endangered mammals. Fewer than 500 black-footed ferrets live in the wild today on 17 reintroduction sites. To ensure their survival, black-footed ferrets and their prairie dog prey need our help.

Black-footed ferret kits playing with enrichment at Cheyenne Mountain Zoo.

How Your Donation Helps:

$15 - Purchases an enrichment item to help ferrets learn and practice navigation skills before release

$25 - Provides essential plague protection for one acre of prairie dogs

$50 - Supplies lifesaving plague vaccine for one black-footed ferret

$100 - Funds on-the-ground biologists for critical field work

$250 - Helps sustain long-term recovery efforts

$750 - Microchip ring readers to identify ferrets in field surveys

$1500 - Purchases dusting equipment to protect ferrets and prairie dogs from fleas that may carry plague

PLEASE HELP US SAVE THIS ICONIC NORTH AMERICAN SPECIES!

Donate Today!

All proceeds Benefit the Black-footed Ferret Recovery Program, a dedicated group of Federal, State, Tribal and NGOs that work to protect and restore Black-footed ferrets in the wild. The Arizona Center for Nature Conservation/Phoenix Zoo collects and distributes funds for SAFE Black-footed Ferret. All donations are tax deductible - (Non-Profit Tax EIN: #86-0174843) For other donation information, please contact the SAFE Black-footed Ferret Treasurer, Tara Harris, at tharris@phoenixzoo.org
